SUMMARY

SOC Analyst with proven expertise in securing enterprise cloud environments, threat detection, and incident response. Demonstrated ability to strengthen cloud security posture management, streamline response workflows through automation, and drive down mean time to respond enabling faster, more effective investigations across complex cloud-scale infrastructures.

WORK EXPERIENCE

SOC Analyst Intern, FICO

June 2025 - Present

- Monitored and triaged security alerts across **Microsoft Defender ATP** and **Cortex XDR**, investigating endpoint threats and reducing mean time to respond (MITR).
 - Conducted threat detection and investigation using **Splunk SIEM**, engineering and refining SPL detection queries to reduce false positives and improve alert fidelity.
 - Automated SOC workflows and response playbooks with **Torq (SOAR)**, enhancing response consistency.
 - Managed continuous cloud security posture across enterprise environments using **Wiz**.
 - Performed network traffic analysis and anomaly detection using **Netography**, identifying suspicious lateral movement and exfiltration patterns.
 - Investigated phishing and email threats with **Abnormal Security**, identifying BEC and social engineering campaigns.
 - Leveraged **Rapid7 InsightIDR** and **SOC Radar / Cyberint** for threat intelligence, tracking adversary TTPs and enriching investigations with external threat context.
 - Managed privileged access monitoring and IAM-related investigations using **CyberArk**.
 - Acted as SPOC for Microsoft Defender, **Wiz**, and **Purple Teaming** initiatives, driving cross-functional efforts to simulate attacks and validate security controls.
 - Monitored web application traffic and enforced security controls via **Imperva WAF**, while managing data loss prevention policies through **Zscaler DLP** to identify policy violations and potential data exfiltration attempts.
 - Collaborated with engineering teams to onboard new log sources, ensuring visibility across critical attack surfaces and improving detection coverage.
-

EDUCATION

August 2022 - July 2026

Bachelor of Engineering CSE
Chitkara University, Rajpura, Punjab

TECHNICAL SKILLS

- Security Operations (SOC)
- Threat detection
- Threat Hunting
- Incident response
- Cloud security
- Endpoint Detection & Response
- Purple Teaming
- Report Writing
- Problem resolution
- Teamwork and collaboration
